

# LET'S THANK OTHERS AND BE HAPPY

The Moon seems so happy.....

So is the flowing water.....

The trees are filled with contentment.

The Stars are twinkling in jubilation.

The silence of Night is engrossed in this blissful moment

They all are not impatient for the SUN to rise.

But are elated to be with each other.

They know that night and day are the part and parcel of life

So, let's take inspiration from them, and start our NEW YEAR by thanking those frontline workers, who have been helping us in this period of the Covid Pandemic and make them happy.

" WE ALL KNOW THAT ONE OF  
THE BEST WAYS TO MAKE  
OURSELVES HAPPY,  
IS TO MAKE OTHERS HAPPY!"
