

*“Hard work is the only key to success. You can’t reach the top without climbing all the steps of the ladder.”*

*steps FOR PREPARATION OF MATHEMATICS*

- ❖ Always keep a copy of the latest CBSE syllabus and question paper design with you.
- ❖ Give extra attention to topics with higher weightage of marks.
- ❖ Mathematics is not meant to be mugged up. After learning a formula/concept, try to attempt a good number of questions based on it and it will get memorized.
- ❖ Make a sheet of important concepts/formulae and paste it near your study table for continuous revision.
- ❖ Don’t panic if you commit mistakes during the preparation phase. This will help you identify your weak areas so that you are not found wanting on the exam day.
- ❖ Work on your fundamentals. Firm groundwork can help score excellent marks.
- ❖ Don’t start a new topic at the last minute. Revise the topics which you have already completed.
- ❖ Try to solve prev. years CBSE board & sample papers.
