

Tips to study Chemistry for class XII

1. Stick to NCERT only. Do all the solved, intext and back exercise questions 2-3 times.
2. Practice questions of organic chemistry as just revising the content is not sufficient.
3. Prepare chapters 14,15 and 16 as they are easy and scoring.
4. Practice solved numerical from any reference book like Modern's ABC or Pradeep Pub and also NCERT.
5. Do not start learning any chapter at the last moment just before the exam as that leads to stress and confusion.
6. Make a list of equations topic wise for p- Block elements and revise it daily.
7. Make a last minute revision copy in which write down the things that you tend to forget.
8. Write resonance structures , draw graphs to make your answers rich in content.
9. Practice solving numerical . Do not just read them.
10. First revise the entire syllabus thoroughly and then start solving sample / previous years CBSE papers.
