

*Scoring 100 for biology is not a very big task if you have the determination and if you work sincerely and honestly . Biology is a scorable subject provided you have to plan and manage your time.*

Here are some preparation tips to score a perfect 100 in class 12 boards:

Just follow the NCERT text book understand the topics well . **“Consider NCERT like a holy book”** use reference books only for clearing doubts.

Biology is a content heavy course and will require multiple readings of NCERT text book as often as possible, do not try to memorize it but try to understand the processes. **Revise the course at least three times**

Lets have a look on the distribution of theory marks in biology so that you can make a strategy to take the board exam.

Unit No.	Unit	Marks Distribution	Important Tips
1	Reproduction	14	Practice diagrams, prepare flow charts of various processes, few long questions and small definitions.
2	Genetics & Evolution	18	Through conceptual clarity and prepare definitions.
3	Biology in Human Welfare	14	Prepare some essay type questions, one line answers.
4	Biotechnology and Its Applications	10	Understand the core process; prepare short answers and application based questions.
5	Ecology & Environmental Issues	14	Prepare short and essay type questions on current issues and definitions

It is advisable to **first revise** unit number **one, three and five** which are Reproduction, Biology in Human Welfare and Ecology and Environmental Issues, respectively. Together these comprise **42 marks out of 70**. These units contain direct information and facts along with figurative description and should be practiced in written.

Unit number two i.e Genetics and Evolution, on the other hand, require exhaustive and comprehensive understanding of concepts to score well in board examination. A good command over Genetics will not only stand you in a good stead but will also assist in a better understanding of unit four i.e. Biotechnology and its Applications.

Your answers must be in sync with the expected pattern and be informative at the same time. It should be written in points in accordance with the number of marks a question carries. One should always refrain from writing lengthy and detailed answers and focus more on writing in points or stepwise.

Apart from that, you can make your answers presentable by representing the important facts and keywords with the help of properly drawn and labeled diagrams, flowcharts, tables, etc.

Remember to **go through the previous year questions along with answer key** they are really helpful.

**Writing sample papers and model exams** too would be beneficial. As exam nears practice one sample paper per day and write complete answers

When you write the exam be careful to **read the question properly** , as in biology board exams careless mistakes are also common .

Lastly one very important point do not take stress, keep yourself happy and motivated throughout .

*These are some of the few things you need to really care as far as biology boards are concerned.....*

***All the very best for you exams!***
