

Water Conservation Workshop By LEAD India

LEAD INDIA organized a workshop and presentation session in our school on the topic ‘ **Water conservation**’ for class 7 and 8. It was indeed a very informative and interactive session.

The representatives of this organization Ms. Katija and Ms Amanpreet asked many questions from the students on why water conservation is important, how do they waste water, what can be the solution etc. After that they even asked students to write their promises to save water on a paper and collected it. Kids realized where they were wasting water and how can they help in saving the most important natural resource.

It was an enriching experience and everyone thoroughly enjoyed it.
