

APTITUDE-TESTING WORKSHOP

A testing session was conducted for two 10th Grade sections (10th-A and 10th-B) by Jitin Chawla's Centre for Career Development at JM International School, Dwarka on 25th April 2019. The test aimed to understand the Interest, Aptitude and Personality of students in order to guide them efficiently about stream selection and the right career path.

The test included 3 sections and they were as follows:

1: Interest Section (This test aimed to analyze the Interest areas of students in different domains). The time limit for this test was 20 minutes and it had close-ended questions.

2: Personality Section (This test aimed to analyze the different personality traits of students, as personality is a major influence on the career choice of a student). The time limit for this test was 20 minutes and it had 5 options which the students had to choose from.

3: Aptitude Section (This test aimed to analyze the different aptitude areas of students, namely Numerical, Verbal, Mechanical, Logical and Spatial). This test will help us to understand the strengths and the weak areas of students in different segments. The time limit for this test was 10 minutes for each section and it was in a multiple choice format.

After the testing, a report will be generated and an Individual Counselling session will be initiated with professional counsellors. This will further help the students to analyze the right stream choice and thereby the career path which the student should follow.

- **Date:** THURSDAY/25-04-19
- **Venue:** CLASSROOM X-A & X-B
- **Conducted by:** Ms. NIKITA KHERA
