

# Mathematics Workshop

Conducted by Mr. Kunal Kumar & Ms. Manmeet Kaur ( JINA Education Society)

J.M INTERNATIONAL SCHOOL, DWARKA has organized an important mathematics workshop for classes XI<sup>th</sup> & XII<sup>th</sup> conducted by **JINA EDUCATION SOCIETY** in association with **UNICEF**. The session emphasized on student learning based on transition teaching model in which students got to know about innovative methods of approaching any mathematics problem with absolutely new set of ideas & approach, emphasizing upon the reason for its derivation and application in real life. The session in class XII was on topic differentiation & integration which focused on consolidating conceptual knowledge & derivation of concepts. The session in class XI was on topic permutations & combinations which focused on foundation building of the topic. In both sessions of XI & XII students also practiced a lot of questions & also got their doubts clarified. In the session career related to mathematics like actuarial science, data science and many others was also discussed. It helped students in shrugging off some preconceived notions about the subject being difficult or boring. This also helped students to carry their positive impression for the subject throughout their academic session.
