Confluence of myriad cultures

The students of class-XI of **J M International School, Dwarka** spent a day marked by the fun-filled activities and engagement meant for schools across the country organised by The British Council.

The students and teachers learnt about India-UK through a Cultural Quiz competition, collaborative storytelling competition with visual art, and Capture the moment, a photography competition.

The participants also experienced an interactive music platform Mix the City in which the users explored the music of a particular region and created their own music compositions that could be shared online.

The aim of the activities was to capture the essence of UK-India partnership and collaboration. The event enriched the knowledge of the participants about the culture of India and the UK.
