Traffic management & road safety

As part of an innovative step to solve traffic woes, the students of **J M International School, Dwarka** yet again proved their versatility by managing the traffic at the NH 24, Ghaziabad traffic signal considered as one of the busiest intersections in Delhi-NCR. All the students managed the rush hour traffic, warned errant drivers and bikers and also learned road safety norms along with the traffic police as a part of the Bharat Positive initiative in association with Speaker of the Year and a leading radio channel. The students also shared their experiences on air and highlighted the importance of road safety education among the masses.

The students were accompanied by Dorris Francis, the traffic queen who controlled traffic havoc at the intersection for no remuneration along with SP Traffic, Ghaziabad. Appre-

ciated by the pedestrians and drivers, the initiative set a tempo to transform India into a positive one by changing the mindset of people towards traffic rules and road safety norms.
