Exhibits & models

A Science exhibition was organised at **JM International School, Dwarka** for the students of classes VI to X. The purpose was to encourage and inculcate scientific temperament amongst students. An array of distinct working and non-working models were displayed. The highlights of the exhibition were working of electromagnets, human digestive system, indicators, methods of separation, conversion of one form of energy to another, to name a few. The models displayed were based on the concepts students learned in the classroom. The parents keenly interacted with students who exuded confidence while presenting their projects and activities.
