

MBS INTERNATIONAL SCHOOL MATHEMATICS WORKSHOP SESSION 2019-20

TOPIC : MATHS WORKSHOP

DATE : July 20,2019

ATTENDED BY : PGT Maths Teachers from different schools

VENUE : MBS International School

RESOURCE PERSON: Dr. Hukum Singh

Glimpse of the Workshop

The pure mathematician, like the musician, is a free creator of his world of ordered beauty.

Aiming to introduce the new pedagogical methods of teaching mathematics, a maths workshop was conducted in MBS International School on July 21,2019 in the school auditorium which was attended by various teachers of different schools. It commenced with a presentation by Dr.Hukum Singh in which he emphasised on Pedagogy and Learning Outcomes in Mathematics. The purpose of the workshop was to reach out to teachers of schools across the city with a new paradigm of mathematics education, one driven by innovation, research, multi-dimensional methodology and the use of technology. The workshop deliberated on various issues related to the integration of technology in mathematics instruction and provided participants with a hands-on experience in using technology tools for teaching mathematics. He also laid stress on learning by doing. He said participants need to make children aware and help them feel that Maths is all around us. The workshop concluded with sharing of experience by the participants from different schools in the Valedictory Ceremony.

The whole workshop was enriching and interesting. Open discussion amongst the Mathematics teachers from various branches of the school

was very fruitful and resulted in discussion about the day to day problems faced by the teachers in classrooms.
