## St. Mary's School, Dwarka Holiday Homework Class: XI

**Subject: Geography** 

| Q1         | Why should we study geography?   | 1   |
|------------|--|-----|
| Q2         | What is gravity anomaly?   | 1   |
| Q3         | Mention two hazardous effects of an earthquake.  | 1   |
| Q4         | Name the most explosive volcano.   | 1   |
| Q5         | Mention the types of forces acting on the surface of the earth.                            | 1   |
| Q6         | Explain the term solar wind.   | 1   |
| Q7         | Describe the different stages of development of the planets.                               | 3   |
| Q8         | Explain the old theories related to the origin of the earth.                               | 3   |
| <b>Q</b> 9 | Who provided the evidence that the earth was expanding. Explain the stages of              |     |
|            | expansion of the universe.   | 3   |
| Q10        | Describe the earth's mantle.   | 3   |
| Q11        | Explain the three stages of the evolution of the present atmosphere.                       | 3   |
| Q12        | Name the natural satellite of the Earth. Explain the theories related to the origin of the |     |
|            | satellite.   | 3   |
| Q13        | Explain the three questions of geographical enquiry.                                       | 3   |
| Q14        | Differentiate between a Terrestrial and Jovian planet.                                     | 3   |
| Q15        | Give a detailed explanation of the formation of intrusive landforms.                       | 5   |
| Q16        | Explain the different sources of information about the interior of the earth.              | 5   |
| Q17        | Write in detail about the branches of geography based on the systematic approach           | h.5 |
| Q18        | What is a shadow zone? Explain the different types of earthquake waves.                    | 5   |
| Q19        | On the basis of the regional approach, explain various branches of geography.              | 5   |
| Q20        | Explain the different branches of physical and human geography.                            | 5   |
