

REPORT ON ORIENTATION PROGRAMME

Conducted By : Ms Sudha Acharya

Attended By : Parents and Students of Class X

Venue : ITL Public School

Organized By : ITL Public School

Destiny is not a matter of chance; it is a matter of choice. It is not a thing to be waited for; it is a thing to be achieved."

Exploring career options is an important step on the road to adulthood. The classes that students take in high school affect the choices they have when applying for college, which in turn affects which career, they can embark on. Having an idea of where they want to be in the next five to 10 years will get them started in the right direction.

In order to facilitate students of **Class X** and their parents to take a well informed decision at this crucial juncture of life, the school organized an **Orientation Programme for Stream Selection in Class XI** on **26 November 2016**. The very astute and erudite school Principal **Ms Sudha Acharya** conducted the expert session and gave valuable guidance to students and parents alike. She implored them to make good choices today so that they don't have to regret tomorrow.

Two of the many prudent advices given by herwere to "unite their avocation with their vocation" because it is linked to the pursuit of happiness and to opt for the unconventional subject combinations on offer in the school so that there is a scope to diversify later in life.

Parents also seemed to have done an extensive research on the subject and queried Principal Ms. Acharya about the scope of various subject combinations. They also expressed their desire to attend a Career Counseling Session by experts from Universities of repute, focusing on unconventional courses and the Armed Forces. They were given an assurance that it would be conducted very soon.

The anxiety of parents and students was quite understandable. After all students are the CEO of their lives and they need to develop life strategies for long-term and short-term goals.

Here's wishing them good luck for their future endeavors!
