

ITL STUDENTS ATTEND AN OVERNIGHT SESSION ON ASTRONOMY

Date : 21 April, 2018
Event : Overnight Observation
Venue : Astroport, Sariska
Organized by : SPACE organization
Conducted by: SPACE organization
Attended by : ITL Public School, Astronomy club members.

The **Astronomy club members** of **ITL Public School** attended an **overnight observation** session at **Astroport** in **Sariska** on **21 April, 2018**.

The objective of the session was to enable the students to acquire the skill to use the telescope appropriately to observe the positions and the movements of the different celestial bodies. The students also learnt the strategies to click from the right angles the photographs of the celestial bodies by using DSLR cameras.

Watching the galaxies, constellations and stars with the help of Telescope was enjoyed thoroughly by the students. They learnt the skillful use of planisphere, a star chart analogue computing instrument which assists to recognize stars and constellations.

This fun filled activity triggered the students' inquisitiveness about Space and the cosmic world. The enthusiasm exhibited by the students is indeed appreciable and will definitely make the ITLeens enthusiastic to explore the intriguing world of the Space and excel in the field of Astronomy.
