

Report on Actuarial Science Workshop

Date : 4 Sep 2018
Venue : Ahlcon International School, Mayur Vihar
Conducted by : Mr. Jitin
Organised by : Australian National University
Attended By : 5 Students of Class XI

A Workshop on Actuarial Sciences was organised on 4th September 2018 by The Australian National University at Ahlcon International School. The workshop focussed on the meaning and functions of an actuary; and highlighted the process of becoming an actuary. The workshop was organised by Mrs Kala Anand and was conducted by Mr Jitin from Australian National University.

It proved to be very fruitful for all the students, since actuarial is a very complex subject and includes a vast pool of information. This workshop thus provided with all the information one needs to know about actuarial sciences. To inculcate the knowledge of actuarial sciences amongst the youth, they also organised various activities and games for the students.

The session also involved an interaction with all the students in the Questionnaire. All the participants were felicitated with certificate of participation and were given gifts (T - shirts) by ANU. The workshop was indeed a great learning experience!!
