

### Report: Dengue Awareness Campaign

Date: 23 July 2019

Venue: ITL Public School

To spread awareness of deadly disease Dengue and promote a safe and healthier learning environment among the students, a team comprising of students and teachers from M.L.Khanna DAV Public School visited the premises of ITL Public School. The team acquainted the students about the symptoms, preventive and remedial measures of Dengue. It was an interactive session wherein the students came up with numerous responses regarding the safety measures against Dengue. They penned down ways to '**Fight the Bite**' and pinned their responses on the beautiful Mosquito Net created to showcase the mosquitoes tangled in it. This initiative not only brought the students and teachers of both the schools in collaboration with each other to sensitise everyone but also helped in realising that each one of us is a stakeholder in curbing the menace of Dengue.
