

Astronomy Day Celebration

Date : Tuesday 14 May, 2019
Venue : Skating Rink
Organized by : ITL Public School
Conducted by : Astronomy club members

ITL Public school celebrated Astronomy Day on 14 May 2018 to showcase the skills that the students had imbibed during the sessions of the Astronomy Club. The event was inaugurated with the lighting of the auspicious lamp followed by a short description by the students highlighting the importance and relevance of observing this day.

The students zestfully presented different aspects of the cosmic world. The series of activities included comet making, make your own Constellation, Safe Solar Observation, Stallarium, Time and sundial, Spectroscopy, Jantar Mantar etc.

The students demonstrated how to observe sun in a safe way through Telescope by using filter and through solar glasses.

The stall demonstrating Jantar Mantar was a great crowd puller where students explained about different Yantras' of the Jantar Mantar. Science behinds Hydro rocketry etc.

The event greatly enhanced the knowledge of the students about the cosmic world and made them more inquisitive to unravel the mystic and intriguing world of the stars.
