The workshop was organized with an aim to help students understand the individualism and different techniques of art and its wholesome effect on the mind and soul. Students were introduced to various art practices and techniques which help in hand movements and analyze different tones of colours. The artist talked about how space in an art work adds more beauty to the painting. Students learnt about adding various tones to a painting and blending. A slideshow on different works of art made by him and his students was shown. The students were advised by Mr. Roy to invest ten minutes daily in scribbling on rough pages for a better patience, focus and understanding of harmonious elements and colour scheme.

The session was very interactive as the artist discussed his signature technique along with helping the students practice the technique on canvas as well. Students were asked to complete a an abstract style painting started by Mr. Roy. The artist inspired the students greatly to create their own master piece by using mixed mediums and new techniques. The students learnt how one can create art pieces by mixing ideas and day to day life. The session was appreciated by the students as it helped them to rejuvenate and stimulate the artist in themselves. Indeed the interaction proved to be a productive amalgam of talent, ideas and discussions.
