

ITL Public School presents Experimental Play - JAL MANTHAN ..Kahani Boond Boond Ki,

As a part of its school wide , ongoing Save Water Movement, ITL Public School presented a spectacular experimental play ... JAL MANTHAN ...*Kahani Boond Boond Ki* ", on 16 November, 2019.

The distinguished **Chief Guest, Shri Upendra Prasad Singh, IAS, Secretary, Ministry of Jal Shakti** addressed the audience on water conservation, importance of ground water & its optimal utilization for sustainable development .

The School Principal, **Ms. Sudha Acharya** enlightened the gathering on the school's efforts in orienting students to save one litre of water every day, replacing single use plastic & fostering students towards eco restructuring for sustainable development. The annual profile marked the riveting academic, sports and cultural excellence achieved by the school.

With more than thousand students participating, the show commenced with eulogizing the "**Panch Tatva - an invocation dance showcasing the divine balance of the Five Elements**". The subtle and humorous *nukkad natak* depicted the alarming statistics and dire consequences of water scarcity.

The highlight of the evening, the experimental play –*Jal Manthan – Kahani Boond Boond Ki*– vibrantly chronicled the sensitive saga related to *water rationing and hoarding, export of virtual water, Carbon & Water Footprints* and *pollution in Yamuna*. The three stories aesthetically interfaced between the water effected lives of people in 1859 Neel Andolan , the rampant encroachment and urbanization and the tormenting times in future we may have to encounter if we are callous and indifferent towards this natural resource.

The profound message *Paani Sahi mein hamari chinta our chintan ka Vishay hai !!!* was well brought home by the unfolding of the cultural extravaganza.
