Conducted by	Centre for Science and Environment(CSE) ,Govt. of India
Attended by	Ms. Shikha Sikka
Participants	STUDENTS OF CLASS XI- XII.
Date	Feb. 6, 2020

CSE's Green Schools Programme, awards schools in India every year for their resource-efficiency – low water use, energy efficiency, low waste generation, harvesting and recycling of water, and providing a healthier space for its occupants as compared to a conventional building. An online audit program provides schools with a methodology to identify and plug the gaps in their environment management practices and move towards resource consumption.

Students of ITL Public School attended the GSP (Green Schools Programme) Climate Change Awards held at Stein Auditorium, India Habitat Centre, Lodhi Road, New Delhi.

Many Engaging activities like the science fair, solar kit making and quiz were organized by the CSE to sensitise the young minds with the growing concern of Environment and Climate change.

The interesting **solar kit activity** was performed by the ITleens which edified them with the knowledge of using renewable solar energy for various purposes.

The award ceremony was conducted by Ranjita Menon, program director-environment education, CSE and was presided by Sunita Narain, noted Environmentalist and Director General, CSE.
