

REPORT ON

CROSSWORD PUZZLE ON MATHEMATICAL OPERATIONS

CLASS: VI

MONTH: APRIL

DATE: 17 APRIL, 2020

ATTENDED BY: Class VI students

“Mathematics is the most beautiful and most powerful creation of the human spirit”

In an effort to lay a strong foundation of Mathematics among the students, the Department of Maths, conducted an activity on Mathematical operations through crossword puzzles.

The activity helped the students to sharpen their skills of oral calculations in a funfilled, methodological and interesting way. It was indeed a brainstorming activity. A crossword puzzle was given to children and they were asked to fill it by solving the equations that involved usage of Mathematical operations (addition and subtraction).

The session was indeed fruitful for the students. It helped them to learn in an innovative and play-way method. Students gained good grip over the usage and application of the operations.
