

REPORT ON WORLD ENVIRONMENT DAY

Theme: World Environment Day

Date: 5 June'20

Class: I -V

“The best time to plant a tree was 20 years ago...

The next best time is NOW”

The theme for the **World Environment Day 2020** is **“Time for Nature- Biodiversity”** with its focus on providing the essential infrastructure that supports life on Earth and human development. It is a call of action to combat the accelerating species loss and degradation of the natural world. Approximately one million plant and animal species risk extinction, largely due to human activities. These are the issues the world cannot lose sight of even as we tackle the coronavirus pandemic and the ongoing climate crisis.

The students of Classes I&II of ITL Public School celebrated this day with great spirit.

The day began with a pledge where in the little ITLeens of Classes I & II took a pledge to take care of our Earth by following the 3 R's i.e. Reduce, Reuse and Recycle and to make the cleaner and safer world for all of us. They also participated in various tree plantation drives where they planted saplings and spoke on the need to sow seeds as a measure to improve greenery around them and making the air clean.

Activity on waste management was conducted wherein students created two bins out of waste tins and covered one with a blue and other with a green paper. They learnt that one bin was for dry and other for wet waste.

Being confined to their homes, the students of Classes IV-V participated in activities that propagate sustainable practices to conserve and protect natural resources and advocate for positive change in our lives. Under the subtheme- **‘Home Sanctuary’** students showcased their efforts in saving water, feeding birds and cleaning air through informative videos. They demonstrated ***making of bird feeders, different ways of irrigating plants like wick irrigation, drip irrigation, Self-watering plants, hydroponics etc. using recycled materials*** and create their own beautiful and organic indoor plants that not only help to clean air but can also be used in kitchen as immunity boosting food.

God has gifted us with Mother Nature who nourishes us at every point...

And the responsibility of saving her lies on our shoulders...

On World Environment day, let us promise to fulfill this responsibility!!!

Care of birds at home garden
