

Webinar on Astronomy

Day/ Date : **Saturday, 30 May 2020**
Venue : **Live Webinar**
Organised By : **Spark Astronomy and Atal Innovation Mission**
Attended By : **Students of Classes VI – XII**

ITL Public School always focusses on the holistic development and takes utmost care to develop myriad of skills among its students. Therefore, ITLeens of classes VI to XII participated in an enriching webinar organized by Spark Astronomy and Atal innovation mission.

The main speaker in the webinar was Aryan Mishra, who is the founder of Spark Astronomy. He is a young amateur astronomer who discovered an asteroid at the age of 14.

In his interactive session with the student, he spoke about his journey in the field of Astronomy. He also shared his vivid knowledge about the Space and different celestial bodies as well as made the students aware about the different skills that can be acquired to fathom the intricacies of this field. In his speech, he encouraged the young learners to develop ideas and become innovative in order to explore the world of Astronomy.

It was indeed an informative session for the students where they were not only actively engaged but were also able to ask numerous questions to the astronomer.
