

WORLD CANCER DAY

Theme: "I am and I will"

Date: February 4, 2021

Classes Involved: I-V

Annually, February 4 is observed as World Cancer Day in order to raise awareness about cancer and reduce the stigma that surrounds this disease.

This international day is a **'Global Uniting Initiative'** led by the **"Union of International Cancer Control"** (UICC) and is meant to encourage the prevention, detection, diagnosis and treatment of cancer as early as possible. This campaign focuses on the community as a whole and the actions that each individual can take towards reducing the global impact of cancer by adopting a healthy life style that includes Good Food, Yoga and regular Exercises.

The primary goal of observing this day is "to focus on positive actions in order to reach the target of reducing the number of premature deaths from cancer" was achieved by organizing some online activities for the students of I-V.

Students of Classes I-IV participated in an online **'Badge Making Activity'** supporting the simple loops of ribbons to show support for people with cancer and to spread awareness about this disease. Class V students created **'Posters'** on the theme-**"I am and I will"** to reiterate the idea behind the campaign that cancer is preventable and it is not incurable.

***"Together we cancer fight.
Together we cancer make healthy choices.
Together we cancer take actions."***
