

## WORLD WATER DAY

Conducted by: Classes VI -X

Date of Event: 22 March 2021

Mode of Conduction: Online

Access to safe drinking water is a basic and universal human right. It is essential to human survival and is a needed condition to exercise the other human rights. **World Water Day** is annually observed on 22 March. This year's theme, '**Valuing Water**' is about what water means to people, its value and how it can be protected as well as conserved. To celebrate World Water Day, students at **ITL Public School** took opportunity to acknowledge the importance of water related issues and raise awareness about the global water crisis through a thought provoking video. The young ITLeens took pledge to conserve water and inspire others also to take action to make a difference.
