

## **Malaria Awareness Week**

**Event-** Malaria Awareness Week

**Date-** 1 to 5 May, 2021

**Venue-** Online Live Session

**Conducted by-** Class IV & V

*‘Small acts when multiplied by the millions of people can transform the world.*

*Let’s join hands together to spread awareness against Malaria’*

‘**Malaria Awareness Week**’ was organized in ITL Public School between 1 and 5 May 2021, to educate young minds to combat malaria by prevention against dreaded mosquitoes. The students were aware of the theme of World Malaria Day, 2021 which is “Reaching the zero malaria target.”

Students of Class- IV participated in online **Role Play activity- “We can fight the Bite”** on causes, effects, symptoms and preventive measures against malaria. They took the role of anchor, doctor, teacher, parent and victim of the disease during the online session to demonstrate their learning of how mosquito bite can be prevented and how disease can be eradicated from our homes and nearby surroundings. They participated enthusiastically in the activity and came to know about various unique measures to prevent the dreadful disease.

**Role play: We can fight the bite**

With an aim to spread awareness amongst the young minds and as a part of environmental education, the students of Class-V participated in **Poster making activity 'Fight against Malaria'** focusing on various preventive measures on reduction of the contact between mosquitoes and humans, the destruction of larvae by environmental management and the use of mosquito larvae predators.

This activity gave the students a platform to showcase their artistic and creative skills; to sensitize others about the importance of saving human lives against communicable diseases. Students also became aware that Malaria is preventable and curable; we can fight it with full efforts to eliminate the disease completely from our country.
