Classes Participated	:	I-XII
Conducted By	:	Science Department

*‘If we are more aware of the food that we should consume, we will always be on the safer side’*

Awareness Generating Poster

E-Magazine with various online events

World Food Safety Day, celebrated on 7 June 2021 aims to draw attention and inspire action to help prevent, detect and manage foodborne risks, contributing to food security, human health, economic prosperity, agriculture, market access, tourism and sustainable development.

This year's theme, 'Safe Food Today for a Healthy Tomorrow', stresses that production and consumption of safe food has immediate and long-term benefits for people, the planet and the economy. Recognizing the systemic connections between the health of people, animals, plants, the environment and the economy will help us meet the needs of the future.

Recognizing the global burden of foodborne diseases, which affect individuals of all ages, in particular children under 5 and persons living in low-income countries, the United Nations General Assembly proclaimed in 2018 that every 7 June would be observed as World Food Safety Day.

ITL fraternity celebrated the World Food Safety Day by organising various activities for classes I to XII like – creating healthy recipes for Covid care , developing comic strips to generate awareness towards healthy food habits and preventing food wastage, collage and poster designing etc. An e-magazine with glimpses of these events was also released to spread awareness towards the commitment to 'Work together for safe food and good health'
