

WORKSHOP ON WASHROOM HYGIENE CONCEPTS

DATE : 4 SEPTEMBER 2014
VENUE : ITL PUBLIC SCHOOL
ORGANISED BY : ITL PUBLIC SCHOOL & WASHROOM HYGIENE CONCEPTS (P) LTD.
CONDUCTED BY : MS. SUDHA CHAKRAPANI
ATTENDED BY : GIRL STUDENTS OF CLASSES 4 TO 12

A very revolutionary and informative workshop on Complete Sanitary Waste Management Solution was conducted by Ms. Sudha Chakrapani, the National Head of Sales & Marketing of a U.K based company, Washroom Hygiene Concepts (P) Ltd. A short video clipping was shown on how to safely dispose off sanitary waste in special bins coated with silver ions provided by the company. This U.K based company provides hygiene solutions to Corporate Houses, Schools & many MNC'S. Having originated in U.K, this whole concept known as the **BIN LINER SYSTEM** based on **BIO-MASTER ANTI-MICRODIAL TECHNOLOGY**, has been introduced in India, to solve the unhygienic sanitary disposal issues, rendering them the perfect solution in the form of these bins. These silver ions destroy the germs & bacteria of the sanitary disposed in it and hence reduce the risk of infections. The school has got around 15 bins installed for the safe disposal of sanitary waste in the girls' washrooms. The housekeeping staff and helpers were also trained on how to use these bins and dispose the sanitary safely.
