

INTERNATIONAL CAREER COLLEGE AND COUNSELLING FAIR

Date: 11 September 2021

Conducted By: IC3

Attended By: Students of Class IX- XII

Students of ITL Public school from classes IX- XII attended a **Live Virtual International Career and College Counselling (IC3) Fair and Symposium** on 11 September 2021. Representatives from numerous countries like the **USA, UK, Canada, Singapore, Ireland** came together at one platform. The students came across a profusion of prestigious universities like **Concordia University, Ohio State University, University of California and The Hong Kong University of Science and Technology** to name a few.

The students put forth their queries in a zealous manner. All the queries put forth were quite dynamic and the representatives also answered all of them in an adept manner. Every aspect of a university ranging from **admission criteria, courses offered and campus details** was elaborated upon.

Furthermore, the representatives provided links to their university websites and brochures to furnish the students with detailed information. This was followed up with a presentation which included information about various **scholarship programmes, university infrastructure, culture** etc. In addition to this, a session '**Ask Me Anything**' was organised with **Mr. Nand Javia** who explained the students about the various kinds of opportunities he got in the US. He also told the students about the facts and key points to keep in mind while making this vital decision. This interactive session helped the students see a realistic picture of what to expect as a student abroad.

The event was organized with the aim to empower students and make them ready for the future. It succeeded in providing them with much needed information and helping them chart their higher education plans. The students found the session quite informative.
