Name of the Event	:	Ozone Day
Date	:	16 September, 2021
Venue	:	School Auditorium
Classes Participated	:	IX-XII
Conducted By	:	Environment Council and Science Club

‘Deal today with Ozone for a Better Tomorrow’

The Environment Council and Science Club of ITL PUBLIC SCHOOL held "Ozone Day", a stellar and informative event for the ITLeens to raise awareness regarding the depleting ozone layer.

The event saw a zestful participation from all the streams, who came together to educate everyone on the pertinent issue.

The event began with the Head Boy, Prateek Arsh (XII-C) tracing the origin of this eventful day, highlighting the theme and focusing on how the UN SDGs help with reaching the goals set in the Montreal Protocol.

After that, the band sung “Love Song for the Earth” to melodiously depict their compassion and gratitude they feel for mother earth which was followed by a video showcasing the importance of the Montreal Protocol.

T. Sanjana (XII-C) came up to express her care and concern for the ozone layer through her self composed poem.

To educate and sensitise the crowd, the Dramatics Club put on a great show through the use of effective dialogues and strong characters with a pinch of humour as a cherry on top. The Dance Department showcased their gripping performance to further solidify the message.

Aaryan Mahajan (XII-B) took over the role of interacting with the audience perfectly as he questioned the audience to keep their minds engaged and further added to their knowledge with facts.

Arsh Arora (XII-B) further spoke about the significance of this day which left the audience awestruck by his heartfelt message.

All ITLeens stood with pride to take the pledge to be considerate, responsible and ozone friendly to ensure the welfare of the present and future generations.
