NATIONAL TECHNOLOGY DAY

Day/ Date   : **Wednesday: 11ᵗʰ May, 2022**

Organized by   : **Department of Computer Science**

Attended by   : **Students of VI-VIII**

"If future generations are to remember us more with gratitude than sorrow, we must achieve more than just the miracles of technology. We must also leave them a glimpse of the world as it was created, not just as it looked when we got through with it."

National Technology Day is observed every year on **11ᵗʰ May 2022**, to honour the advancements made in the field of Science and Technology, one of the fields in which India saw major growth and development after its independence. With various advancements in the sector, India has climbed its way up in the list of countries that are potential superpowers in the coming future. This date is also significant as it was on this day in 1998 that the country successfully conducted the famous Pokhran nuclear tests.

With technology taking precedence and becoming accessible to all, it has become extremely important to be aware of fraudulent activities that take place. An assembly was organized on the theme **'How to Maintain Cyber Security'** to edify the idea of being safe while online. The assembly began with a graceful dance performance by the students of classes VI-VIII. The students depicted the journey of our nation on its way to becoming a nuclear power, with the success of Chandrayan and Mars Orbital Mission in the field of Aerospace Technology to innovations in AI. Thereafter, a Quiz was organised, where the students were divided into four teams **(Team Hack Hogs, Team Cyber Squad, Team Bug Hunters, and Team Trojan Squashers).** All the teams underwent a series of questions based on cyber security, divided into three rounds and eventually **Team Trojan Squashers** emerged as the winners. The Quiz Masters (Hiteccha Sahni, Priyal Khullar, and Akshat Walia) kept the audience engrossed throughout by sharing constructive information as they asked questions.

Furthermore, **Aishani Chauhan (VIII D)** shared her thoughts on the concerns regarding cyber security. She shared engaging anecdotes and facts related to how people can save themselves from online fraud. She also emphasized how we can save ourselves from falling into the trap of a sedentary lifestyle in the wake of technology. The assembly concluded with the **Guest Speaker Mr. Rakesh Vashishtha** sharing significant information regarding the importance of passwords and how people should create passwords that are not easy to decipher and be cautious while accessing any social media website. The assembly concluded with a vote of thanks by Ananya Thapliyal (VIII-A).
