

## **DOCTORS' DAY CELEBRATION AT ITL**

In an endeavour to empower learners with 21st century skills and promote holistic curriculum by bridging the gap between vocation & education, as envisioned by the NEP 2020, ITL Public School organized a Workshop and Training Session on Medical Emergencies Management in Schools for the students of Classes IX, X & XII on July 1, 2022.

Nonetheless, another informative Workshop on Handling On-Field Sports Injuries in School was conducted by a renowned medical Physiotherapist, who deliberated on various first-aid techniques to deal with emergency situations in school ground while playing sports.

As a part of the 10 Bag-less Days initiative, the ITLeens interacted with a team of medical specialists from the Indian Association of Paediatrics who gave the necessary insight into the various kinds of emergencies like asthma, anaphylactic shock, injuries, convulsions, and other traumas that can take place in the school premises and the first aid that can be administered and optimum care and initial management that can be done before taking the child to the referred doctor or hospital.

The workshops provided the much-needed understanding to the students providing them with prompt and effective medical management strategies that can be adopted, whenever the need arises.
