

Road Safety Quiz

Date : 28th July 2014
Conducted by : ITL Public School in league with the British Council
For : Classes I-XII

Road safety is a crucial issue for each and every one of us and in order to be safer on the roads, we need to understand what the risks are and what can be done to mitigate them. Young people have the most to gain from awareness on road safety, as it is their lives which are most at risk on the roads. Nine in ten of the world's traffic deaths occur in developing countries and many accidents could be avoided through better education about the risks of being on the road. It was with this thought that ITL Public School, Dwarka in league with British Council of India conducted a quiz on Road Safety for classes 1-12 as a part of ISA Activity.

After taking the quiz, the children gained an understanding of the importance of road safety awareness, as well as a sense of responsibility for spreading the message to their peers and family.
