

E-STEAM challenge in association with Biomimicry India

Date : 27 July 2022

Venue : Nirmal Bhartia School

Organised by : Nirmal Bhartia School

Attended By : Students of classes VIII, IX & XI

Prashant Dhawan, Co- founder of BioMimicry India gave an immensely informative and interactive presentation on “How and Why Biomimicry is important in our lives and businesses”, especially how they will help us in the “We Can Together” session.

The prestigious and inspiring program was designed for today's youth to put forth ideas on how they can sustain the environment with the aim to build ideas that correlate with nature. The project to be done has a week's deadline for students to present their ideas which can be used as a household staple and manufactured in future factories.

He graced the occasion and motivated the young entrepreneurs to believe in their ideas and keep expanding their horizon of knowledge. Teacher mentors of participating schools were also there to witness the encouragement of Biomimicry in this programme.
