

ITL OBSERVES INTERNATIONAL DAY FOR THE PRESERVATION OF THE OZONE LAYER

Name of the Event: International Day for the Preservation of the Ozone Layer

DATE: Sept.16, 2022

CLASSES PARTICIPATED: I TO XII

CONDUCTED BY: Science Department

***“For life on Earth, protect the ozone layer and prevent climate change*”**

The ozone layer is a fragile shield of gas that protects the earth from sun's harmful UV rays, thus helping preserve life on planet. However recently, due to increased use of CFC's, Freon's, aerosols hydrofluorocarbon (HFC's), depletion of ozone layer has been observed.

ITL Public School observes International **Day for the Preservation of the Ozone Layer** on **16th September' 22** to raise awareness amongst students so that together we can combat the problem of ozone layer depletion and encourage sustainable development. Let us join hands to work in the direction of saving ozone with our synergized efforts in sync with the theme for the year 2022, **Montreal Protocol: Global Cooperation Protecting Life on Earth**.

Students designed posters and energy saver logos on **importance of ozone layer**. Through posters they tried to express ways to protect the ozone layer and focussed on how we can control total global production and consumption of substances that deplete it, with the ultimate objective of their elimination on the basis of developments in scientific knowledge and technological information.
