

Study Abroad Workshop by Princeton Review

Date : 5th May 2014
Venue : Auditorium
Conducted By : Princeton Review
Organized By : ITL Public School
Attended By : Class XII

On 5th May 2014, the school, in collaboration with The Princeton Review - the world's largest test preparation company in SAT, GRE, GMAT and ACT - held an interactive session for students of class XII.

The academic mentor of Princeton Review, Mr. Sumeet Jhamb, extended his knowledge to the students about studying abroad, which provided the students with a significant opportunity to discuss about what all they require in order to get accepted by a good college and how to proceed about it. The students enquired about the various tests in order to apply in the most suitable colleges. This seminar helped students to know about things like, the ideal time to start preparing for such tests, the ideal time to start sending applications to colleges, career opportunities abroad, cost of living abroad and a lot more.

The Princeton Review also extended scholarships and motivated the students of ITL Public School based on their class X result which is a great privilege. It was an informative and motivational session as the information provided in the seminar made the students realize that they needed to work hard in order to achieve their goals.
