

COMMUNITY CLEANLINESS DRIVE

Date: 1st October 2019

Day: Monday

Organized by: Social Service Club

‘Leadership is about empathy. It is about having the ability to relate to and connect with people for the purpose of inspiring and empowering their lives’

- Oprah Winfrey

Empathy is one of the most important aspects of creating harmonious relationships, reducing stress, and enhancing emotional awareness. From the global perspective, empathy is infinitely important particularly if it ends in compassion. This kind of empathy usually compels people to step in and help.

The students of ITL Public School visited the Bharat Vihar community for the community cleanliness drive on the account of Gandhi Jayanti to mark a realization of Gandhi ji's dream of clean India. The kids of Bharat Vihar were brimming with ceaseless energy and had many dreams for their life. The event commenced with an interactive session with the students. They were oriented about cleanliness, waste segregation and ban on the use of one time plastic. It was indeed a bliss to be a part of the prize distribution ceremony regarding the painting competition held in their community on 1st October.

The students ITL Public School had a fun time knowing about the children of Bharat Vihar and we made many friends too. Those children have taught the life lessons to be happy even when you do not have enough. Refreshments were also distributed. After having our refreshments, brimming with enthusiasm, we started on a rally in the community to cut the use of plastic and eliminate it from our lives. The rally also focused on the hazards that plastic poses. With sheer zest and zeal the students repeated the slogans one after the other to sensitize the community and reduce the use of plastic.

This visit was enlightening because the students could see the reality of the unhygienic conditions that we dwell in. This experience was definitely an eye opener and the students took an interesting story back home.

By contributing to their community, students not only play an important role in strengthening and improving the society but also become well-rounded human beings. They grow up to be Individuals who actively participate in the community and contribute to its betterment.
