

ITL CANDYFLOSS

Science Week Report

Session 2021-22

Day/Date: Monday, 6th September-Friday, 10th September 2021

For the little curious minds of ITL Candyfloss, fun and Engaging activities were planned during Science Week held from Monday, 6th - Friday, 10th September 2021.

Day 1: Refractive Magic

"Aabra ka dabra"... and what do we see?

Kids found Light Refraction magic in the glass which occurs when light travels from one medium to another.

ABC

Day 2: My 1st weighing scale

Students know "weight" by physical appearances that is; 'Fat and 'Thin'. But with this fun activity they experienced the comparison between heavy and light too.

Day 3: Colorful Conversations

Another amazing activity of mixing colors, but this time we haven't used paintbrushes to do so. Our lovely kids get fascinated by colors all around, adopt new mediums, and never hesitates to use them.

Day 4: Balloon Helicopter

All the eyes were on the dancing balloon when the teacher loosened the air-filled balloon in front of the kids. They observed how hard air is pushing the balloon until it comes out completely.

Day 5: Water Xylophone

Ding Dong, and we all wanna sing a song. When they saw and heard the sound of each glass with different water levels, they had so much fun and enjoyed it a lot.
