National Science Day Report

Session 2021-22

Day/Date: Monday, 28th February 2022

National Science Day is celebrated on 28th February annually to commemorate the discovery of “The Raman Effect” by Sir C.V. Raman. Little explorers marked this day vigorously, this year with the theme” Integrated Approach in S & T for Sustainable future”. Importance of this day was discussed during the class initially, and session continued with an experiential activity “Experiments are fun”, in which children observed and learnt effects of gases in blowing up of balloon with the help of certain ingredients like baking soda, vinegar, balloon etc.
