He taught ten new words to students in a very innovative manner. He used audio visual aids for the same and kept the students engaged by asking them various questions.

Overall, session lasted for an hour and was very interesting. It was a great learning experience with tips given on how to remember meanings of new words in a very easy manner.

The feedback by students is as follows :

The webinar was all about the uses and importance of Wow Vocabulary. Vocabulary is like ocean which never ends. It is very challenging to memorize words. But, by a simple trick which was taught in the webinar it is really easy now. I and other students also shared their views and doubts.

The webinar was really sapid and informative. At last I want to say "Thank you " to my teachers and school authorities for providing me such an opportunity of attending an amazing webinar. Thank you

It was literally a very nice class. We had got an opportunity to learn many new words with the help of our traditional language. We can just break a word into two and understand and relate it's Hindi meaning to it's English. Everyone of us have definitely felt it very sapid and enthusiastic. We were explained many things with the help of certain video clips. I would like to suggest that if they would have given us some more words as our homework and practices, it would be better for us to understand it. I would like to thank Pratham Workshops for giving us such a nice and informative class.

It was really an informative and fruitful session. It was never that easy for me to remember new words with their meanings. The mnemonic way of learning which was taught was amazing. Just making out simple ways to understand words which we are newly introduced with like acerbity, camaraderie,

aphasia as taught in the session. A new way of memorizing which will help me a lot in developing my vocabulary.
