

THE AIR FORCE SCHOOL, SUBROTO PARK, NEW DELHI

SCIENCE WEEK CELEBRATION AT TAFS FROM 26.07.21 TO 30.07.21 **FOR CLASSES VI TO XI**

The students of TAFS participated in the SCIENCE WEEK celebration - **SCIENCEPORIUM** with great enthusiasm!

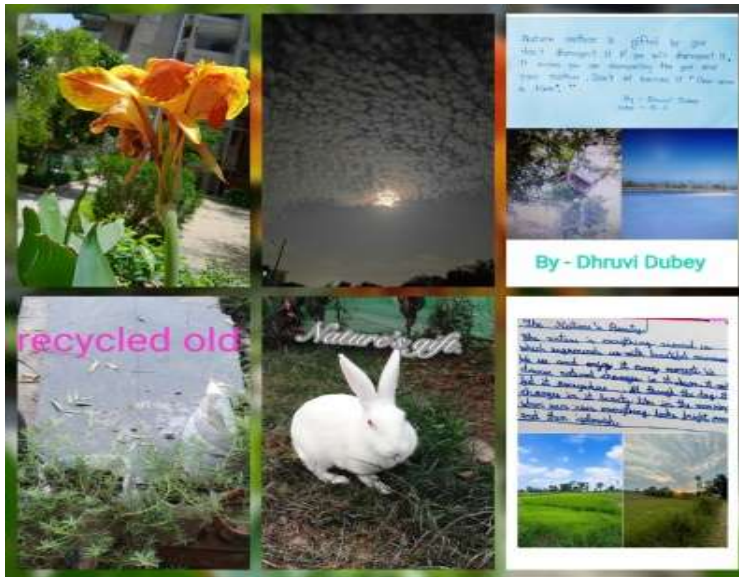

It was a great opportunity for the students to unleash their talent and learn various aspects of Science by exploring and doing!!! This week was full of activities and this made students to think beyond books and explore the world around them. The activities were carefully planned for the various age groups.

The children came up with brilliant ideas.

The activities planned for classes VI TO XI are as follows :

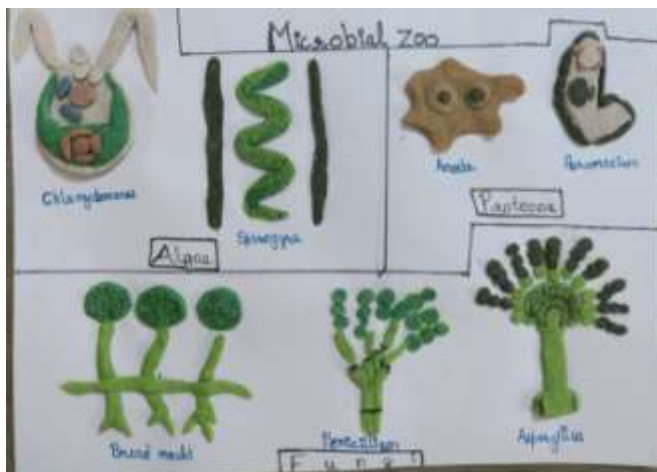

- Science activity named '**Captured**' was conducted on **26.07.21 (Monday)** for class **VI**. Students captured the essence of nature in still photography with two shots. A suitable caption was given to the photographs taken & few

sentences were written about it.

Here are some pics which our TAFSIAN's clicked!!

- In class **VII** an activity named '**Adapt To Survive**' was conducted on 27.07.21 Tuesday . In this students picked up any plant/ animal of their choice in its natural habitat and made animations on A4 size sheets and coloured them. Dialogue boxes were drawn to show the adaptation of that plant/animal to survive in that habitat.
- For class **VIII** the activity planned was: **Microbial zoo**
Date: **28.07.21** (Wednesday)
In this, students were asked to make as many microorganisms as they want with clay. The art of moulding clay displayed how creative they all are. Students placed the microorganisms on an A4 size sheet and made a zoo out of them.

- As a part of the event called **SYMPOSIUM**, an essay writing competition was organised for class **IX** on **29.07.21 Thursday**. The topic of the competition was **Reducing the use of single use plastics**. It was organised with the aim to instill amongst students a habit to minimise the use of single use plastic and look for other alternatives. Students of class IX participated with great enthusiasm and came out with innovative ideas like use of paper , bamboo and metal straws , use of earthen bottles and use of **Neem sticks instead of toothbrush**.

Overall the competition created a sense of belonging for the mother earth and developed love and care for environment

- Activity/Event for **class X** was : **PHOTO ESSAY A picture is worth a thousand words was organised on 30.07.21 (Friday) .**

The children used the power of images to explain any scientific phenomenon or principles happening around them.

- Activity/Event for **class XI** was : **Science Talks** organised on 30 .07.21 (Friday)

Topics:

- MARS CALLING - Will our generation make it happen?
- SYMMETRY OR CHAOS - Nature through my eyes.
- GLOBAL WARMING VERSUS CLIMATE CHANGE- Let's pledge to save Earth!

- FUTURE OF SCIENCE - Apna Time Aayegaa
- LET'S WAKE UP! – My request to you all.
- FROM ENGINE TO MOTORS -The future of Automobiles.
- VACCINATION WILL REALLY MAKE IT HAPPEN- We will be back! General Guidelines:

The science week was a huge success!
