A New Tomorrow

RESULTS

Principal's Message

Dear Principal

I thank you for the wholehearted participation of your students in our Inter –School Festival, “**THE QUEST 2022**”. The Quest was a grand success with the participation of 36 schools from Delhi NCR region.

The students displayed enthusiasm and brought forward many new creative displays of ideas.

It has been our endeavour to make students agents of change, empowering them with essential skills. Events such as, The Quest spur them to explore and experiment.

I hope your students had an exhilarating experience in discovering their talents through participation in various events.

We invite your valuable suggestions for making our future festivals achieve still higher milestones in the days ahead.

Thank You.

Warm Regards

Amita Gupta

INSPIRING SUSTAINABLE ATTITUDES

There are many types of devices used for packaging materials. Some of the devices or robots are enormous in size and some of them are small in size. These are devices which are like the Luggage Wrapping Machines which are used in airports or while shifting from one house to another. They generally use single-use plastic for this job. Another machine is Air Pillow machine which are used to fill the empty space in a box with a pouch of a small bag filled with air. There are even machines which convert electrical energy into heat energy to seal off the pouches so that nothing comes out until you tear that pouch.

PRANAV GARG

TAGORE INTERNATIONAL SCHOOL, VASANT VIHAR

Sustainability is the avoidance of the depletion of natural resources in order to maintain an ecological balance. The four pillars of sustainability are-

Human sustainability	Social sustainability	Economic sustainability	Environmental sustainability
Its aim is to maintain and improve the human resources in society.	Its aim is to preserve social resources by investing and creating services that help in the development	Its aim is to keep the resources intact by improving the standard of living.	Its aim is to improve human welfare through protection of natural resources

SINGLE-USE PLASTIC

Single-use plastics are also called disposable plastics which we use for one-time use and are supposed to throw away or used for recycling purposes later. common examples of single-use plastics are straws, soda & water bottles, coffee stirrers, food packages, etc.
