

IMPACT OF COVID-19 ON OUR ENVIRONMENT
SOCIAL SCIENCE -VIII
DOODLE MAKING ACTIVITY

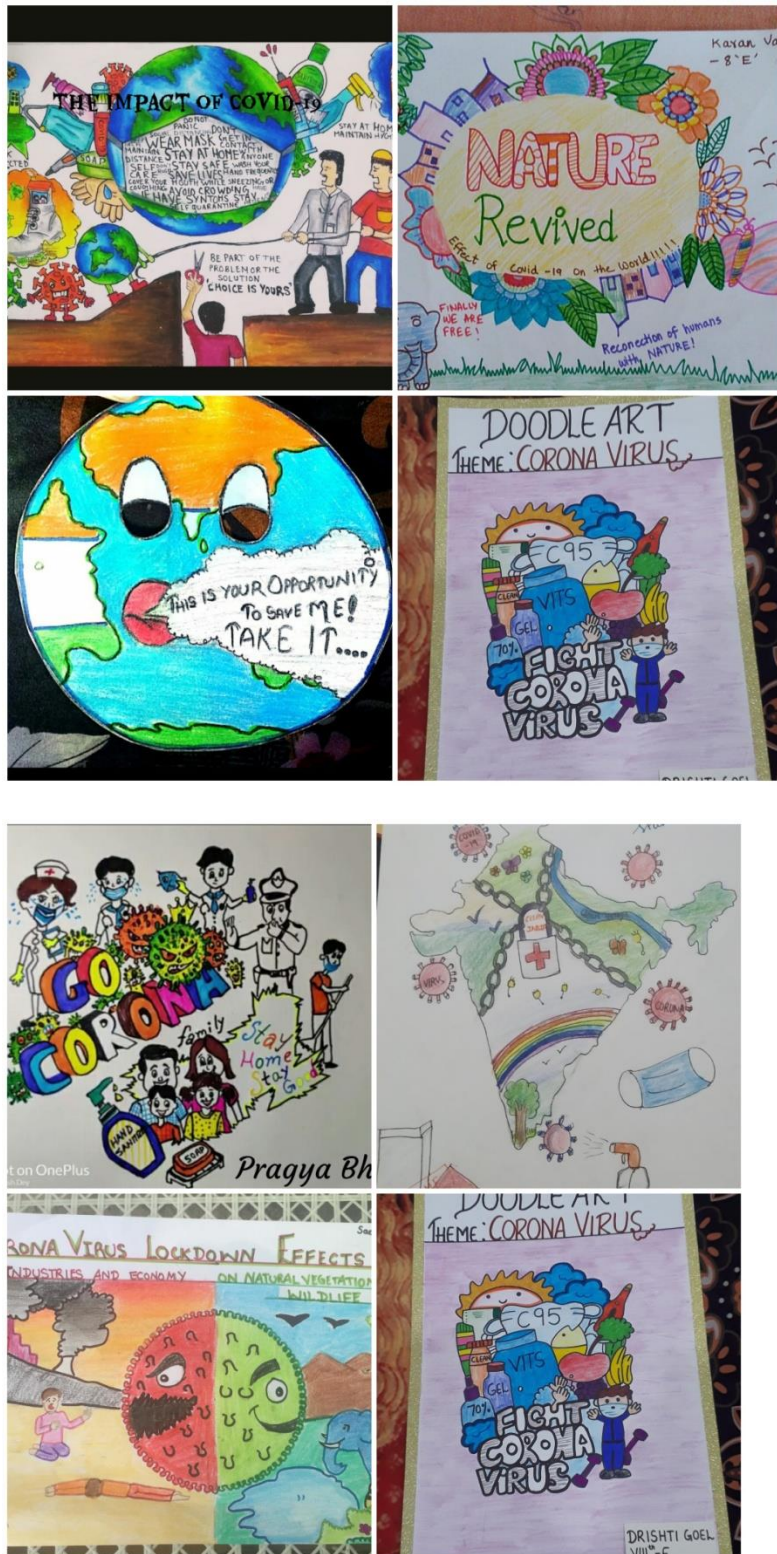

The Social Science Department conducted a doodle making activity on the topic- 'Impact of COVID-19 on our environment' for all the classes of VIII today in their virtual classes.

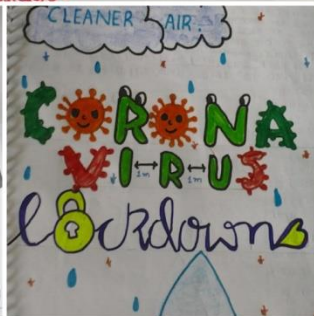

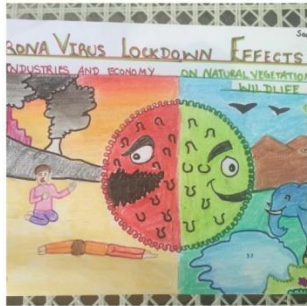

The objective of the activity was to make the students aware about their present environment- clearer than ever; to develop an understanding about how we, the humans have polluted our environment in the wake of industrialization and urbanization- to an extent that the natural vegetation and wildlife was being destroyed; the deeply polluted water was resulting into a lack of oxygen further killing the aquatic life; and pollution-global warming leading to ozone depletion.

It is important for our students to realize and understand that the –'Earth is healing during this lockdown'.

The activity fulfilled its purpose as the students were able to express their unique individual ideas in the form of doodles. The zeal and enthusiasm shown by the students in doing the activity was commendable.

Lets now have a look at their creativity-

THANK YOU
