

## **REPORT ON THE MATHS DEPARTMENTAL ACTIVITY**

### **CLASS VII**

**A journey of a thousand miles begins with a single step.**

The Maths Department had organized The Departmental activity for class VII on 15<sup>th</sup> May 2020. The topic for the same was INTEGERS MAZE. Mathematical operations between integers were done by this board game.

Children tried to find a path between starting cell and target cell. They solved integers of 1<sup>st</sup> cell then choose correctly answered arrow which transported them to next level. Likewise this process helps them to achieve the target.

This activity helped children understand importance of hard work and right decision at each stage of life. As every problem comes with a solution. It motivates them to achieve their target by facing problems like a fighter and finding their solution.

The enthusiasm and vigour shown by them in doing the activity was commendable . The beauty of mathematics is all around us, we just need to observe.

Some of the glimpses of the activity are shown below-
