## Description

- Students were accompanied to a 400 square yards of residential plot in sector 10 Dwarka, opposite Venkateshwara International Kids school and were given an assignment to create conceptual sketches of their two-story dream residence. The purpose of the site visit was simple, which was to understand and visualize and to integrate the theoretical concepts taught in class. These 3rd year Students were asked to take a peek into what they did in first year and what different will they want to do now.
- Students integrated their ideas taking into account the design brief, the site context, microclimate of the site, the sun path, the wind direction, the building bye laws etc. and created conceptual sketches which led to the design development stage.
