

## Online Mentoring Session

Members of STEM/ATL club attended the online mentoring session conducted by ATL Mentor Mr. Gaurav Kumar (working in Singapore) on 10th April and 23rd April in which they learnt about the process of ideation and design. They learnt how simple ideas lead to great innovations.

The image shows a presentation slide with a list of steps for Design Thinking:

1. Think of Problems. Find one problem
2. Think of 10 ways of solving it
3. Eliminate Not-so-great solutions
4. Finalize your idea to solve the problem
5. Fill the below table

Below the list is a table with five columns:

Define your problem Statement (max 2 lines)	What will change ? (1 line only)	3 Best ways of solving it	The best way to solve it and why?	What do you need for this idea to be executed ( list as many things you can think of )

A video call overlay is visible on the right side of the slide, showing participants: Poonam Sharma (Host, me), Gaurav Kumar, Tavishi Schrawat, Rajni Terkchandani, and Anikita Dergaria. At the bottom of the slide, there is a status bar indicating "10:17:02-4100-6637" and a "Stop Share" button.
