

ISA English Project 2020-21

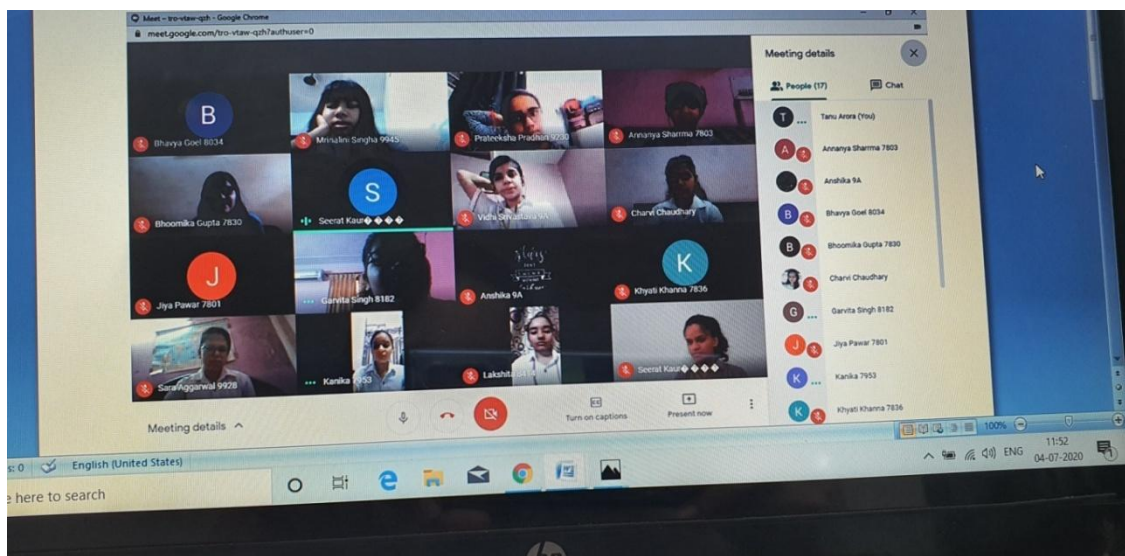

Best Power Point Presentation Making Activity

As part of the ongoing ISA (International School Award) Project, students of grade VIII, IX and XI submitted their power point presentations on the topic Mime and Pantomime on 12th July 2020.

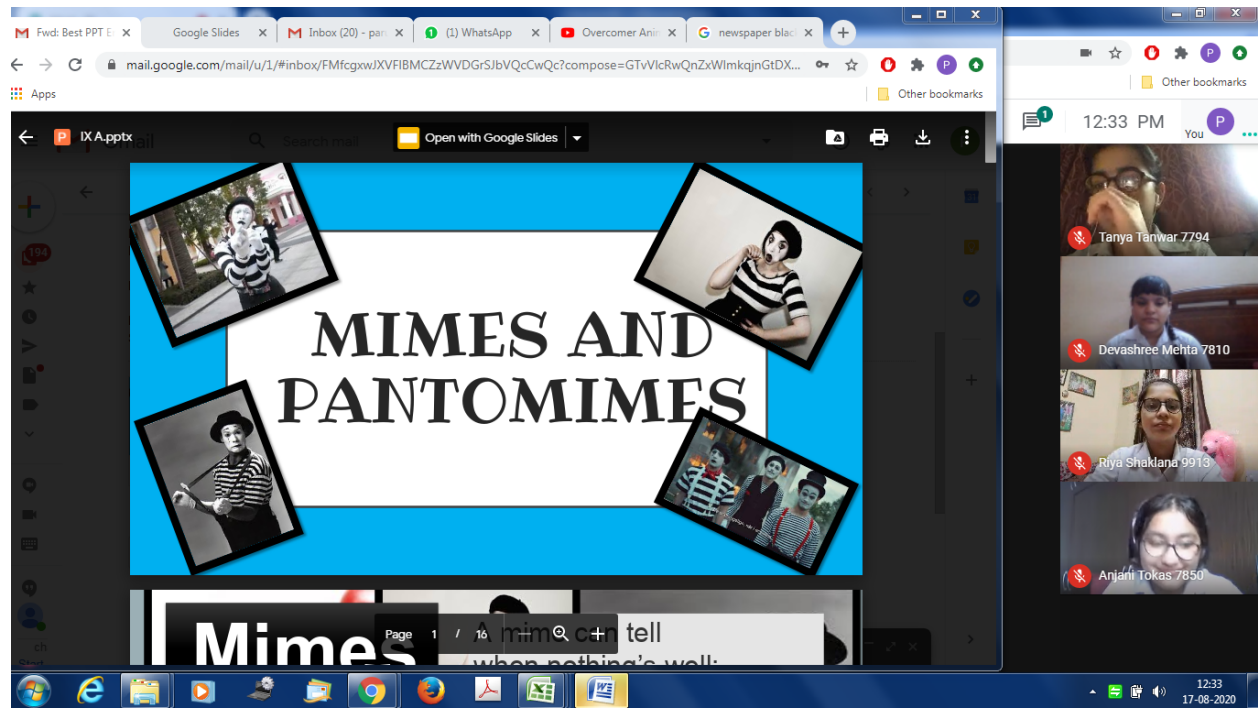

Students explored their creativity, innovation, understanding and knowledge on the origin and history of this art form by studying the countries from where it originated namely Greece, Rome, France and India. They worked collaboratively to complete this task through an online platform by organizing themselves into groups, assigning tasks to each other, participating in small meetings through Google Meet and Zoom and bringing their presentations to a completion. All entries were judged on the basis of background information, content accuracy, use of graphics, grammatical lexicon as well as overall presentation. Students then completed a worksheet on the topic Mime and Pantomime and further strengthened their understanding of this technique of art.

The best Power Point Presentation was shown in all the classes on 17th August 2020 and the winning team was congratulated for their effort. It also earned a special mention in the annual e-exhibition of the School on 22nd August 2020.

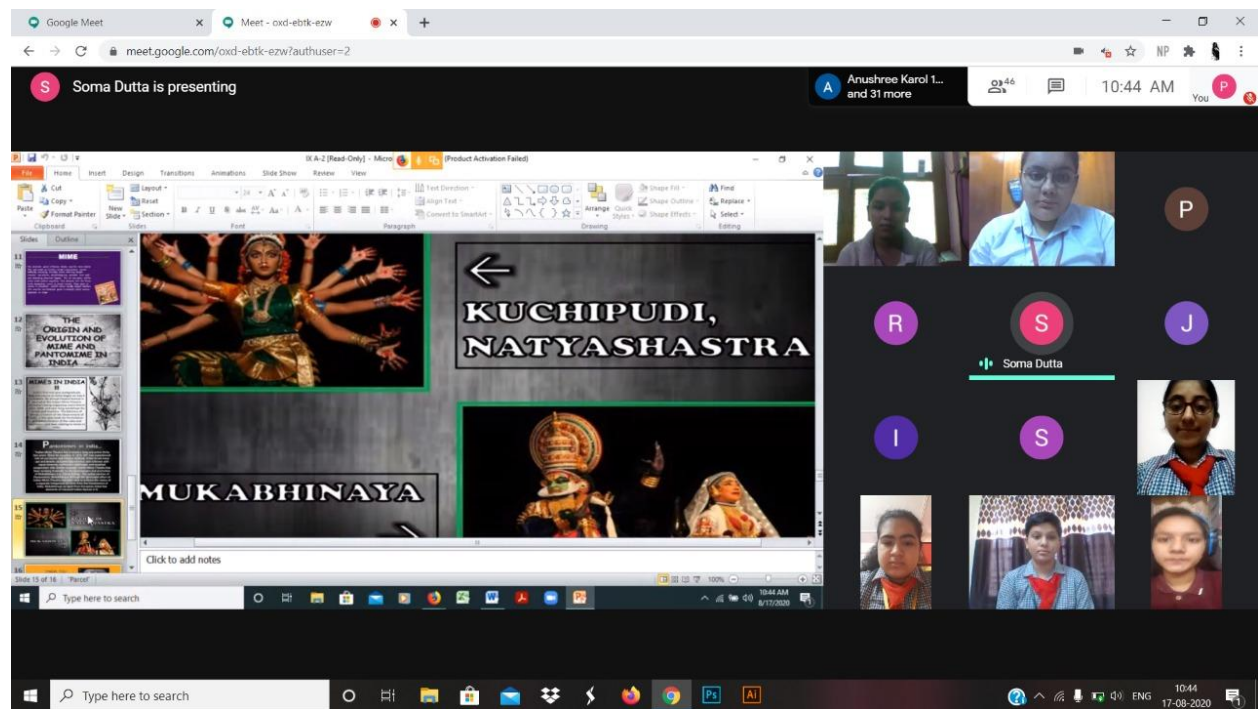

Collaborating to Make the Power Point Presentations through Google Meet

Announcement of the Best PPT in Class: Waiting with Bated Breath

Slide Title: **The new arts : mime and pantomime**

Text on slide: As soon as mime and pantomime was introduced in the theatres, it became the talk of the town. The performance of pantomime originates at its earliest in Ancient Greece; the name is taken from a single masked dancer called Pantomimus. In Greece the first recorded pantomime actor is the legendary dancer Telestes. With the addition of text, protagonist, and stage sets, miming and dance remained intrinsic to both tragedy and comedy. As the Greek Theatre developed movement became basic to the actor's act. And, though the art of mime in Greece developed into several distinct categories, it rarely separated from dance and speaking theatre!

Image on slide: A black and white photograph of a mime artist in a striped shirt and top hat, holding a cane.
