

MUN 2017

Model United Nations ,a platform where students get a chance to replicate The United Nations Conference and learn about a lot of brizzy and hot topics of modern world . The students then debate on the issues with all respect and doing justice to the country assigned to them . The main aim of MUNs is to come up with a solution to the problems and drafting a resolution to the problem . This year , a group of fifteen students from Greenway Modern School got a chance to attend " Consilium " - MUN Conference 2017 on 25 -26 August at "The Millenium School - Noida " . It was an amazing experience for the young greenwanians , who got a chance for the very first time . Students were supposed to do research on a topic , thereby expanding the horizons of their

intellect . It was an overwhelming experience for everyone on the MUN team , facing the world , learning new things and coping up with the fear of public speaking . MUN are a good source of not just knowledge but also of inspiration and a complete personality development process . Every student felt honoured and over whelmed after been given a chance to present and improve themselves . It was an excellent experience.
