Class : 7th

Subject : Science

Chapter I : Nutrition in Plants

Topic:

Activity -Saprotrophic Nutrition.

AIM:

Growth of fungus on a slice of bread.

Objective:

- 1) Students met the term fungi (singular-Fungus).*
- 2) Fungi are carried in the air as spores when these spores land on bread slice (food source) they germinate & start to grow as fungus.*

Procedure:

- 1) Take a slice of bread & moisten it with water .*
- 2) Keep it in a moist & warm place for 2 or 3 days.*

Result:

Some fluffy patches appear on the surface of the slice of bread (these patches are of fungus).

Note:

The patches of fungus may be white, green, black, brown or any other colour
