

ITL Observes World Wetland's Day

Name of the Event: World Wetland's Day

DATE: Feb.2, 2023

CONDUCTED BY: SCIENCE DEPARTMENT

STUDENTS PARTICIPATED: VI TO XII

“The wetlands help to sustain life on this planet and so it is of utmost importance that we save the wetlands.”

ITL Public School celebrated World Wetlands Day (WWD) on 2nd of February to raise global awareness about the high importance of wetlands for people and our planet. This year's theme is ***“It's Time for Wetlands Restoration,”*** which highlights the urgent need to prioritize wetland restoration and calls on an entire generation to take steps to revive and restore degraded wetlands. Wetlands are the natural solution to cope with climate change. Power point presentations and videos were shown in classes VI-IX to make them aware regarding importance of marshy miracles and how saving of our blue carbon ecosystems can help to mitigate climate change. The message was spread in all classes via WhatsApp official groups. Let's do our part by raising public awareness of wetlands values, benefits and promote the conservation and wise use of wetlands.
